

 eBike Labs

Secure your e-bike fleets  
and enjoy your growth ride

# Bring intelligence to your e-bikes

Introducing the connected brain for your e-bikes: the eBikeLabs vehicle control unit. It turns affordable e-bikes into theft proof, low maintenance, and enjoyable fleet vehicles.

## eBikeSafe: anti theft system

The eBikeSafe patented anti theft system replaces hardware locks and it blocks the wheel of the e-bike using the motor itself.

- > **Unbreakable system:** the only way to bypass eBikeSafe is to destroy parts of the drive system
- > **Battery theft protection:** the battery and vehicle control unit are paired, making it impossible for them to work separately
- > **Safe remote control:** remotely lock/unlock the system only when the e-bike is not moving
- > **Integrated theft alert:** surprise thieves with alarm and security lights
- > **Can be integrated in any e-bike** equipped with a wheel motor

**Protect  
Capital  
Investment**

# Take full control over your fleets

The vehicle control unit opens unprecedented cloud service capabilities.

## eBikeCheck: optimized maintenance

Makes it easier than ever to take care of each e-bike of the fleet.

- > **Predict** failures before they can occur
- > **Cure** them using 1 min complete remote diagnostic with step-by-step guide
- > **Prevent** parts from excessive wear
- > **Do nothing and save:** Replace hardware components with algorithms: pedaling torque, odometer, motor position, temperature...

**Reduce  
Operational  
Costs**

**Increase  
Customer  
Loyalty**

## eBikeProfile: safe & enjoyable rides

Safety technologies allow to keep your riders safe and happy.

- > **Remotely set** acceleration restrictions
- > **Prevent** riders from reaching excessive speed
- > **Ensure** smooth and progressive riding experience

# Hey mobility operators!

We can help you to launch a sustainable e-bike fleet in a few months.

Here is how:

## Why partner with us:

- > Fast time to market
- > Easy integration
- > Patented technology
- > Compliance with EU LEV regulations
- > Guaranteed ongoing support and maintenance

## About eBikeLabs

At eBikeLabs, our mission is to accelerate the adoption of shared e-bikes in cities.

Because we believe that e-bikes are the best answer to mobility demands - they are fast, for everyone, they fit city infrastructure, good for the environment and health.

At eBikeLabs we remain committed to our mission by helping mobility operators to deploy large e-bike fleets into cities all around the world.
