

eBikeLabs has been selected by Allianz France and Toyota Tsusho Europe to participate in the co-acceleration program dedicated to new mobility in Europe.

26 February 2019, Grenoble France: [eBikeLabs](http://ebikelabs.com), leading technology provider for ebike sharing, selected by Allianz France to participate in the co-acceleration program with Toyota Tsusho Europe. This new co-acceleration program is dedicated to work on new and urban mobility challenges.

eBikeLabs mission is to provide the complete solution for ebike shared mobility market. eBikeLabs was chosen for its capability to make electric cycling safer.

"We are proud to have eBikeLabs on board for this first co-acceleration program of the Allianz France Accelerator with Toyota Tsusho Europe that focus on new mobility. It is a great opportunity for Allianz France to explore potential synergies in this space to improve safety and to provide new opportunities of development to eBikeLabs". – Sylvain Theveniaud, Managing Director, Allianz Accelerator

"I'm very happy and proud of being the part of the accelerator together with Allianz France and Toyota Tsusho Europe. This is a perfect way to kick off a new year! The co-acceleration program will help us to increase our boundaries and continue to move towards our goal - become key technological partner for dockless ebike businesses." - Mael Bosson, CEO & Founder eBikeLabs.

About eBikeLabs: eBikeLabs empowers mobility operators with the complete solution to launch dockless e-bike business and share a fleet that is secured, sustainable and profitable.
